Hi,

I would like to try out the Radio Shack DSP filter (mostly because it is
much cheaper than any other I have seen on the market) to improve my
HF mobile setup by cleaning up nasty alternator hash that I haven't been
able to clean up by conventional means. Is anyone using this filter? Is
it any good? How does it compare to more expensive ones like the
Timewave (especially when it comes to cleaning up mobile noise)?

Thanks for your input.
